FOR IMMEDIATE RELEASE

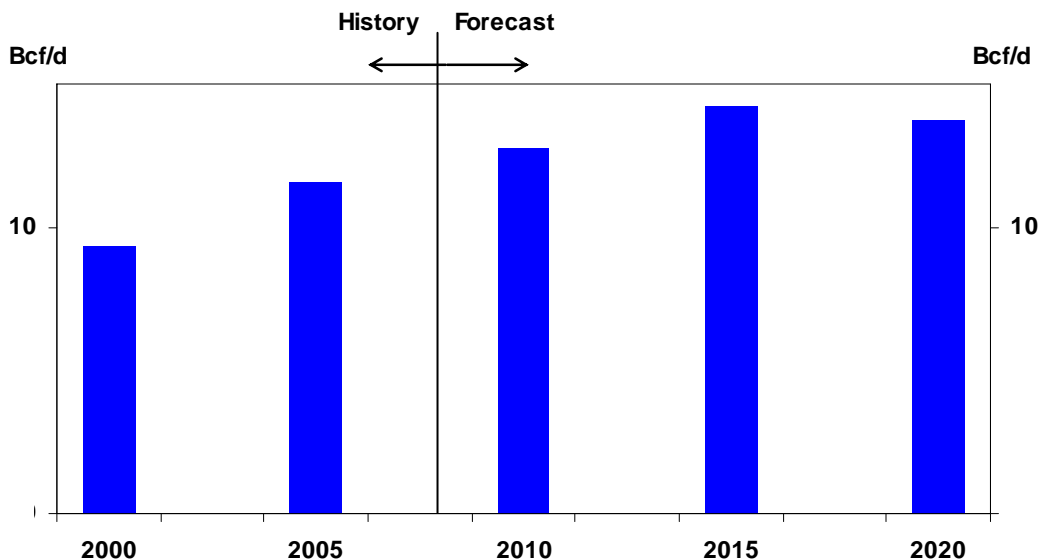

Calgary, July 2, 2009

**Ziff Energy Report:
*U.S. Rockies Gas Production Outlook to 2020***

Ziff Energy announces the release of a report which forecasts gas production through 2020 for 6 major U.S. Rockies gas basins (Green River, Uinta, Piceance, San Juan, Powder River, and Other). For each of the 6 gas basins, the report provides a 10 year outlook of expected gas well completions, productivity of new gas wells, and gas production forecast. The report provides an analysis of the supply/demand balance for Rockies gas.

Figure 1 shows Ziff Energy gas production for U.S. Rockies to 2020. Over the last decade, the Rocky Mountain region saw average production growth of 4.6% per year, primarily due to infill drilling of existing Tight Gas. Ziff Energy believes that Rockies gas production will peak in the next decade, then start a slow decline as new lower-productivity wells fail to offset declines of existing wells.
